Core Principles and Philosophical Foundations

Doshas: The Pillars of Ayurveda

At the heart of Vagbhata's teachings are the three Doshas—Vata, Pitta, and Kapha—which govern physiological functions and maintain balance within the body.

- Vata: Responsible for movement, nerve function, and circulation.
- Pitta: Governs digestion, metabolism, and thermoregulation.
- Kapha: Provides structure, lubrication, and stability.

Vagbhata emphasizes the importance of maintaining the harmony of these Doshas for optimal health, highlighting that imbalance leads to disease.

Dhatus and Malas

The body is composed of seven Dhatus (tissues):

- Rasa (plasma)
- Rakta (blood)
- Mamsa (muscle)
- Meda (fat)
- Asthi (bone)
- Majja (marrow)
- Shukra (reproductive tissue)

Malas (waste products) include urine, feces, sweat, and expired air. Proper functioning and balance of Dhatus and Malas are crucial for health, and their disturbances are central to disease pathology.

Agni (Digestive Fire) and Ojas (Vital Essence)

Vagbhata places significant emphasis on Agni, the digestive and metabolic fire, which influences the transformation and assimilation of nutrients. A balanced Agni results in healthy Dhatus and Ojas, the subtle essence that sustains immunity and vitality.

Vagbhata advocates a meticulous diagnostic process involving:

- Detailed patient history
- Observation (Darshana)
- Palpation (Sparshana)
- Auscultation and percussion (Shabda and Spandana)
- Examination of bodily secretions and excreta

This comprehensive assessment aids in understanding the root cause of ailments and tailoring personalized treatment plans.

- Shamana (Pacification): Use of herbal medicines, dietary modifications, and lifestyle changes.
- Rasayana (Rejuvenation): Therapies aimed at restoring vitality and immunity.

This integrative approach underscores the importance of restoring balance rather than merely suppressing symptoms.

Pharmacology and Medicinal Preparations

Vagbhata provides detailed descriptions of numerous medicinal herbs, their properties, and pharmacological actions. It classifies medicines based on taste (Rasa), potency (Virya), post-digestive effect (Vipaka), and energetics.

Key points include:
