Planning Your Arctic Latitude Rowing Expedition

- Selecting Your Route and Latitude

Choosing the right latitude for your journey depends on several factors:

- Experience Level: Less experienced rowers may opt for routes at lower latitudes (around 70° N), where conditions are slightly milder.
- Goals: Scientific research, adventure, or cultural exploration?your purpose influences your route.
- Environmental Conditions: Higher latitudes (above 75° N) involve more extreme weather, thicker sea ice, and longer periods of darkness.

Popular routes include:

- The Northwest Passage, crossing from Atlantic to Pacific via the Canadian Arctic Archipelago.
- The Greenland coast, navigating along the 70°-75° N line.
- East Siberian Sea routes at around 80° N for the most extreme journeys.

- Timing and Seasonality

Arctic conditions are heavily seasonal:

- Summer (June to September): Short window of relatively milder weather, midnight sun, and

melting ice.

- Spring and Fall: Transition periods with unpredictable weather and ice conditions.
- Winter (October to April): Continuous darkness, extreme cold, and thick ice cover?generally unsuitable for rowing expeditions.

Most successful journeys are planned during the Arctic summer, when daylight hours are extensive, and ice conditions are manageable.

- Permits and Regulations

Navigating Arctic waters requires thorough understanding of international regulations:

- Obtain permits from relevant authorities (Canadian, Russian, Greenlandic, or Norwegian agencies).
- Coordinate with environmental agencies to minimize ecological impact.
- Respect indigenous territories and rights.
